## BASEBALL

The plays in this pocket-size game are the same as in real "Big League" Baseball with hits, runs, stolen bases, errors, and every other thrill. All plays are made by rolling of the dice. The total of points shown on the dice determines the play.

GAME CONSISTS OF, Baseball Diamond, ten playing pieces, 3 dice, and score sheets.

Two or more persons can play. If more than two play, each participant selects one of the teams as a favorite, since there are only two teams as in regular Baseball.

HOW TO PLAY. The team "at bat" rolls TWO DICE. The "Pitcher" of the opposing team rolls ONE DICE. Game starts by "Pitcher" rolling one dice and followed by "Batter" rolling the two additional dice. The sum total of ALL THREE DICE indicates the "play" (shown on the schedule of plays.)

The play continues until there are three "outs," which constitutes one-half inning. The opposing team then goes to "Bat" using two dice, while the other side "Pitches" using one dice. The game then proceeds until there are again three "outs" and this ends the inning. The sides then reverse playing positions again and the next inning proceeds as before. This procedure is followed for nine innings as in regular Baseball.

Holes are provided on the playing field for the men on bases. Also on the score board to register strikes, balls, outs and runs for each inning. After each inning, put the score on the Score Sheet, which is your permanent record as the game proceeds.
