# SHUFFLE JIG

A New and Fascinating Puzzle Game  
Your Bridge Friends Will Like It

A game for four players which combines the added thrill of competition to the fun of assembling jig saw puzzles.

Each player is given a key piece from one of the four puzzles containing the same number of pieces, after which the four puzzles are thoroughly shuffled together in the centre of the table. This done, each player selects the pieces corresponding to his or her key piece and proceeds to assemble the puzzle.

The first player completing a puzzle is the winner and receives 50 points. The second player to complete a puzzle is awarded 30 points, the third 20 points, and the last 10 points.

Puzzles are then passed in rotation, but before re-shuffling takes place the key pieces are distributed as before. This is repeated until all the players have completed the four puzzles. Scores are then checked.

Players may select partners or play individually as the choice dictates. Scoring may be modified as desired.

This may be played by two, three, or more than four players by the inclusion of additional puzzles.
