# GAME OF Fortune Telling and Character Reading

For Any Number of Players.

## IMPLEMENTS

consist of 48 cards and this book of instructions, which also contains some tables, the use of which will be explained later.

## THE OBJECT

of the game is to read people's characters

## TO BEGIN:

Make one person the "reader." Let him first take from the pack the 12 cards printed entirely in black, with a blue line under the heading. Choose a member from the company who desires to have his or her character read. Ask the person what *day and month he was born*. This question must be answered correctly. Let us suppose the date to be August 3d. The reader then reads at the top of the black type cards until he comes to the proper date. We find it is the sign of LEO (♌), the Lion, which suits persons born from 22d July to 22d August. August 3d comes in between these dates. Read the printing on the card, and it will give a broad general outline of the person's characteristics.

Now, if this same person has been born since the year 1872, we can find out more

about him by seeing where the moon was at the time of birth. Let us suppose the person was born August 3d, in the year 1881. Turn to the tables at the end of this little book until you come to the page headed

"The Position of the Moon for the Year 1881."

We find, by running a finger across the 3d until we come to the column of August, that the moon was in the sign of ♏, which is SCORPIO.

Let the reader now take the 36 cards left in his pile, and divide them into books of three, according to the letters in the upper right-hand corner (i. e., the three A's together, and so on). Remember, our person was born August 3, 1881, in the sign of LEO (♌). Therefore, take the three LEO (♌) cards, marked "E," and look over them until you come to the one having on it "LEO (♌) with the Moon in SCORPIO (♏)."

This shows us that the original LEO (♌) character is modified, and gives the person "a tendency to be egotistical and arrogant. Lots of pride of the wrong sort."
