## JIG BRIDGE

Jig Bridge\* is a combination jigsaw puzzle and game. The complete puzzle consists of the usual four playing card characters, namely: Club, Diamond, Heart and Spade.

One complete set is required for one to four players, two sets for five to eight players, and so on.

The object of the game is for each player to complete the character designated by the card he draws.

### RULES FOR PLAYING

First, place all the pieces in the center of the table. Then, from the four aces of a pack of playing cards, each player draws a card which designates the character he is to assemble. The players then take

pieces at will and start fitting them together, discarding to the center of the table all pieces that cannot be used. If the player finds that he is assembling the wrong character, he can separate the pieces, return them to the center of the table and start over again.

If a player discovers another player assembling his character, he can, by placing his finger on it and saying "JIG", claim it.

The players that complete their character, score as follows: Club 10, Diamond 20, Heart 30, Spade 40.

The player finishing first gets an additional score of 50.

JIG BRIDGE can also be played by partners, in which case each can assist his partner by helping assemble their respective characters at any time during the game.
