rotato chips

THE ROTATING PICTURE PUZZLE!

You Can Do Rotato Chips IN YOUR LAP!

NO TABLE REQUIRED BECAUSE THE CHIPS STAY PUT!

This unique feature makes ROTATO CHIPS —

- IDEAL-**
- ON TRAIN TRIPS
 - FOR THE CONVALESCENT
 - AT THE BEACH, ETC.

DIRECTIONS INSIDE

Manufacturers and Distributors: MURRAY GRUMETTE CO., 1615 AVENUE EYE, BROOKLYN, N. Y.

DIRECTIONS

- I. Each ROTATO CHIPS Puzzle Picture consists of two sections — a folding section that contains only the border of the picture; and a center section that fits inside the border. Unfold the border section and lay it flat on a table. Then insert the center section inside the border, pressing the center section down until it snaps firmly into place. This will make a fairly rigid picture twice the size of this package.
- II. Push the CHIPS out of the picture with your finger. This leaves in the picture a network of circular holes, all the same size. You will note that each hole yields two CHIPS — a RING, and a DISC inside the RING. Separate each DISC from its RING. Shuffle the CHIPS. The object is now to replace each CHIP in its proper hole, so that the original picture is restored exactly. As each CHIP fits in every hole, you must first find the one right hole. Then you must ROTATE the CHIP to the one right position in that hole. (This revolutionary new ROTATION element makes ROTATO CHIPS a tantalizing and amusing pastime that will keep the veteran puzzler busy and fascinated for hours!)

To avoid mixing the Chips of Different Pictures, note that for each Picture, the reverse sides of the Chips are **all of the same color.**

If you are doing ROTATO CHIPS on a train, in bed, at the beach, etc., you can make an improvised table on your lap by simply placing the box and its cover side by side (long sides touching) and fastening them together with two ordinary paper clips.
