The wisest men in all countries know that the Planets, the Stars, and the Moon have a deep signification for human life and the greatest men at all times have consulted the „stars“ about their future. Each old popular belief involves an old truth, therefore never begin to undertake anything whatever it may be, when the moon is waning. The best time being during the first quarter. The small Oracle-Siar has been composed according to this belief and to researches made, and you will find in the reply of your queries that the prime of the moon, with few stars, having the most favourable signification for you, whilst the waning moon, with many stars, requires caution in all matters.
