

# CASINO GOLF

## Rules

To assemble Casino Golf, drop the two green inclines into place, one between each set of red posts.

Set up the game on floor of living room, lobby or porch, according to diagram, which is arranged for players of average ability. Distances between markers may be increased or decreased according to skill.

In the event that floor space is limited, all players may face the cup from one direction, using the same approach.

**POSITION OF PLAYERS:**—Half on one side; half on opposite side.

### FORM OF PLAY:

Twosome—One playing against another.

Threesome—One plays two others but the two play one ball.

Foursome—Two on each side but each side playing one ball (alternately).

Three Ball Match—Three players, each playing his own ball against the other.

Four Ball Match—Four play, each playing his own ball, but divided two on a side, each side scoring with the ball making the better score.

Best Ball Match—One player matches his ball against the best ball of two or more others.

Free for All—As many play as desired, using one or more outfits.

Tournament—Eliminations down to the best singles or foursome.

**THE PLAY:** Using regular golf putter and ball, each player makes a short putt into cup while disk is spinning; low number then plays from a point opposite marker bearing same number as that on which ball has come to rest in cup.

**OBJECT:** To "putt" the ball, from indicated position, into the spinning cup, with the least number of strokes. After each unsuccessful attempt ball must be returned to original position for another try. When the putt becomes successful, strokes are counted, and the number on which the ball falls indicates the position from which next opponent plays.

**SCORING:** In "match play" that player or team having the least number of strokes for each hole wins that hole, and the player or team credited with the greatest number of holes at the end of the course, wins the match. In "medal play" the total strokes required for all holes of the course are compared, and the lowest stroke score wins the match. The course consists of nine or eighteen holes.

**CASINO GOLF WITH CHIPS:** Settle with chips, on holes, strokes per hole, or strokes per game of nine or eighteen holes.

**HANDICAP:** Shorten the marker distances or allow strokes per hole, strokes per game, or holes per game, to less experienced players.

**OUTDOOR CASINO GOLF:** The game may be played on the lawn, in accordance with the foregoing rules, or varied as follows:

Instead of returning ball to the original position of first stroke, after an unsuccessful attempt to "hole out," the player may be required to play his ball back into a putting position for another attempt at the same approach. Each stroke is to be added to the player's individual score for the hole.

Any number of further elaborations of the above rules will be found possible, at the option of the players to fit conditions or circumstances under which it may be desirable to play.
