

CAN YOU DO "HOO DOO"?

"Hoo Doo is three puzzles in one. Each puzzle getting progressively more difficult.

1. In the outlined center square (4x4) using all eight colors, arrange 16 pegs so that there are no duplications of colors in any row; vertical, horizontal or diagonal.

2. In the outlined (6x6) square, follow the same pattern. Fill 36 holes with colored pegs without duplication of colors in any row; vertical, horizontal or diagonal. To fill the 6x6 square, you are only allowed to use five pegs of four colors and four pegs of the other four colors.

3. The (8x8) square is a completely new puzzle. Start with the board empty. Now disburse one color at a time without duplication of colors as above. All 64 holes must be filled. You are allowed to use the two neutral pegs anywhere on the board to eliminate two color duplications.

Note: By diagonal, we mean all diagonal lines; all directions, when you are completely frustrated, write to us for help and we will send you a printed solution. Please enclose ten cents in coin for postage and handling.
