OLD MAID GARD

Rules for the Game of OLD MAID

THERE are 26 pairs to this game, a pair being two of the same picture and one picture of the Old Maid. Shuffle the cards and deal one at a time until all the cards are distributed.

The first thing to do when the cards are raised for the first glance, is to match as many pairs as possible. Put these face down on the table.

The dealer now draws a card from the player on his right, if it matches with a card in his hand, he puts the pair down on the table. The player on the left does the same, and so on.

The game proceeds until all pairs are matched, leaving the Old Maid card in one player's hand. He is the loser.
