

Fish Pond

(Lion Coffee game premium by Woolson Spice Company)

Directions

Cut out the pond and set it up like the top of a pasteboard box, being sure it is locked at the corners. Cut out the fish and set them into the holes of the pond, tail downward. Make a fishing hook and line by tying a bent pin, or piece of wire, to one end of a thread eight or ten inches long, and for a handle use a lead-pencil or short piece of wood.

Each player is given one minute to catch all the fish he can, by hooking each fish through the eye, and landing it on the table. Two players can fish at once if preferred, and continue until all the fish are caught.

The player (or side) catching greatest number of pounds of fish wins; or, the number of fish instead of pounds can be counted.
